

BUSINESS CONTINUITY & WORKPLACE RECOVERY

OUR SOLUTION

Strategic business continuity plans should include disaster recovery and workplace recovery options to maintain your data security and availability. RACK59 data center delivers an advanced, highly reliable and redundant infrastructure to maintain access to your company's data and business systems. Our business continuity and recovery experts can design and implement a custom solution to secure your IT infrastructure, and insure business continuity and workspace for your employees.

RACK59 CAN PROVIDE:

- 150+ shared workstations in a climate controlled, cubicle divided, multi-tenant environment.
- Private, custom designed workspaces with workstations and meeting rooms designed to the customer's specific needs.
- When applicable, dedicated fiber network access is available to a customer's colocation rack in the data center.
- VOIP and PC network access points located in the business continuity space and meeting rooms.

Workplace Recovery
