WHERE OKLAHOMA CONNECTS

Improve your network performance and save money by peering with top internet and content providers on the iX-OKC platform

01 / SHARED VLAN PEERING

02/ PRIVATE PEERING

WHERE OKLAHOMA CONNECTS

Why iX-OKC?

01 / TRANSIT SAVINGS

Peering helps you save OPEX by providing a local path between parties while reducing the load on international IP Transit links.

02 / NETWORK PERFORMANCE

Improve performance reliability and reduce latency for the Oklahoma market by peering in our neutral internet exchange platform.

03 / NETWORK AGGREGATION

Our IXP network can easily aggregate a large number of relatively small peering sessions across a single fixed-cost peering port, with zero incremental cost for each peer.
